

BCCU BULLETIN

2ND QUARTER

ATM Safety

The following prevention tips can help make the use of ATMs safer for everyone.

- Be aware of your surroundings and what is going on around you. Criminals tend to avoid people who have this type of demeanor.
- Follow your instincts. If you feel you are in danger, respond immediately. Remember that your safety is the priority.
- Avoid ATMs at the corner of a building. Corners create blind spots and can be an easy place for robbers to hide.
- Identify ATMs with natural surveillance and visibility of the surrounding area.
- Avoid ATM locations that are surrounded by shrubbery, landscaping, signs, decorative partitions or dividers.
- Select an ATM in a well-lit location and if possible, monitored by a security officer.
- Think out what you would do in different crime or personal security situations and have a game plan.
